Each year, Americans observe **National Hispanic Heritage Month** from September 15 to October 15, by celebrating the histories, cultures and contributions of American citizens whose ancestors came from Spain, Mexico, the Caribbean, Central and South America.

The day of September 15 is significant because it is the anniversary of independence for Latin American countries Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua. In addition, Mexico and Chile celebrate their independence days on September 16 and September 18, respectively. Also, Columbus Day or Día de la Raza, which is October 12, falls within this 30-day period.

September is **Childhood Cancer Awareness Month**, a time to bring awareness to pediatric cancer, which remains the leading cause of death by disease for children under the age of 14. Every day 43 children in the U.S. are diagnosed with cancer.

We want to recognize the children and families affected by childhood cancers and to emphasize the importance of supporting research on these devastating conditions. This month, and throughout the year, we honor the children currently battling cancer, the families who love them, the clinicians and other caregivers treating them, the survivors of childhood cancer, the children who lost their lives to childhood cancer, and the researchers working to conquer childhood cancer.
